Managing Reproductive Life
Soraya Tremayne - 2001
In 1999, the Institute of Social and Cultural Anthropology at the University of Oxford held a workshop on the social dynamics of human reproduction. This volume contains 12 papers from scholars in Britain and the U.S. that were originally presented at that workshop. Topics include, for example, motherhood among young prostitutes in Thailand, the meaning of children in Hong Kong, and the reproductive health of refugees. Studies in the Sociology of Population
Jon Anson - 2019-01-23
This book presents a cross section of the work and concerns of social demographers worldwide, covering a broad range of topics from social structure through population structure to social policy; from fertility and mortality through migration to the way in which organisations deal with the demographic environment in which they operate. Topics addressed also include morbidity and health profiles and transitions, as well as policies and programs concerned with these and other issues. The volume touches on some of the major links between population and societal dynamics. It addresses demographic patterns and issues from micro-level, meso-level, and macro-level perspectives and helps put into focus the past, present and future of the mutual relations between population dynamics and societal responses. With a unique introductory chapter discussing the global unevenness of population growth today, its associations with inequality and the challenges it presents for the future, and a truly international approach to social and demographic change and policy responses, this book will serve as a valuable resource for professionals and students in sociology, demography, social policy and local governance.

Intercultural Variation in Family Research and Theory - Roma S Hanks - 2014-05-12

Intercultural Variation in Family Research and Theory sets forth 23 critical reviews in a 2-volume set that document the development of family research and theory in various societies around the world. Focusing on modern research while drawing on the historical roots of theoretical and methodological approaches employed in the study of family, this collection not only increases your knowledge about the status of family research in various countries, but also inspires cross-national research among researchers and scholars. The societies being studied have been grouped by region: Volume I contains the set’s Introduction and contributions from the Far East, the Baltic region, Australia, and South Africa. Volume II covers the Middle East, Western Europe, Scandinavia, and also includes the Index. The materials in these two volumes are the result of the charge given to scholars of 23 societies to review the development of family theory and research in their homelands. Their obligation was to provide an analytic report telling a story from their perspective of reality. The book’s editors now present some of the commonality of experiences and trends of the researchers and interpret country differences and similarities from their writings. Intercultural Variation in Family Research and Theory holds numerous suggestions for your investigations into the family field. You’ll find that the set adds to the body of knowledge on comparative family analysis and raises concerns and issues for future research. The questions addressed in this book include: how gender of the investigator influences choice of research topics how funding sources shape the research agenda what influence a researcher’s career trajectory has on research topics, methods, and procedures why psychological and sociological frameworks and methodologies are commonly used in family research how political policy influences and dictates theory development and research what to do about the multitude of new questions that inevitably arise from such intercultural research

Family Growth in Metropolitan America - Charles F. Westoff - 2015-12-08
This analysis is based upon a study of 1,165 couples, all of whom had two children by the time of the interviews and lived in one of the Standard Metropolitan Areas. Its findings shed new light on the relationship between fertility-planning behavior and such variables as socio-economic status, social mobility aspirations, adherence to traditional values, interest in religion, marital adjustment, amount of education, and feelings of personal adequacy. A resurvey is planned for three years later, to analyze subsequent attitudes and behavior. Originally published in 1961. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Demographic Analysis - Roland Pressat - 2020-10-11
Population control requires that the birth rate equal to the death rate. If it is too low population will decline; if it is too high, population will increase. If either condition persists long enough the population will diminish towards zero or increase towards infinity. Fortunately, the birth trajectory does not have to be set once and for all, but can be adjusted within limits. Since birth and death rates determine whether we are heading for population extinction or explosion, they are well designated “vital statistics.” Their understanding and use are a central theme of demographic analysis. "Demographic Analysis" presents those techniques that are often called for in the study of demographic problems. Such techniques permit researchers to fill the gap between the large amounts of data made...
concrete future will follow either path. The practical questions that need to be answered; the techniques of this book effectively bring the data into confrontation with the problems. In his treatment of population projection, Pressat applies methods developed in earlier sections for mortality and fertility. The emphasis is on population projection and accords with its usefulness in demographic analysis. The meaning of a demographic rate or trend is brought out by seeing to what condition it would lead if continued. No assumption is made that the concrete future will follow either path. The substance of the book is devoted to the main themes of mortality and fertility. Underlying these as well as nearly every other kind of data with which the demographer deals is the problem of location in time - the relation of vital events to the calendar, and also to the age of the persons undergoing them. Pressat's detailed attention to this problem forms a solid basis for how current methodology accounts of demographic changes.

Animal Dreams - Barbara Kingsolver - 2009-10-13
From Barbara Kingsolver, the acclaimed author of Flight Behavior, The Lacuna, The Bean Trees, and other modern classics, Animal Dreams is a passionate and complex novel about love, forgiveness, and one woman's struggle to find her place in the world. At the end of her rope, Codi Noline returns to her Arizona home to face her ailing father, with whom she has a difficult, distant relationship. There she meets handsome Apache trainman Loyd Peregrina, who tells her, "If you want sweet dreams, you've got to live a sweet life." Filled with lyrical writing, Native American legends, a tender love story, and Codi's quest for identity, Animal Dreams is literary fiction at its very best. This edition includes a P.S. section with additional insights from Barbara Kingsolver, background material, suggestions for further reading, and more.

The Sociology of Canadian Mennonites, Hutterites and Amish - Donovan E. Smucker - 2010-10-30
The editor provides an important new scholarly tool for locating and understanding the enormous expansion of scholarly research dealing with the sociology of Canadian Mennonites, Hutterites and Amish. Although the book includes research from American scholars, the editor devotes special attention to Canadian works concerning these important and interesting minorities. Using the tripartite division of Mennonites, Hutterites and Amish, the bibliography includes 800 entries each with a concise summary and evaluation. The entries are listed under the subheadings: books, theses, articles and unpublished manuscripts. Preceding the bibliography itself is an essay by the editor originally presented to the Canadian Sociology and Anthropology Association. The essay outlines the differing conceptual assumptions of the researchers included in the book, the major methodologies employed and the main conclusions to be drawn from their work.

The Male Clock - William Marsiglio - 2015-03-17
As speculative fiction informed by social science and biomedical perspectives, The Male Clock propels readers into a futuristic, yet believable world transformed by SGEV – a debilitating virus that drastically compromises men’s ability to procreate. Set mostly in the years 2034-2042, Jordan Giordano, a prominent American journalist, navigates a world steeped in personal misfortune and public controversy. Jordan
Family Relations. Kendra Siler-Marsiglio, Ph.D. father and family man while doing investigative reporting related to the ever changing social landscape with its radically altered sexual politics, heated public debates, and new technologies. The troubled era is defined by its upswing in baby farming, pharma company transgressions, new S.W.A.T.-based and bioterrorism technologies, sperm retrieval companies, sperm ID cards, devices preventing wet dreams, a surge in lesbian relationships and male prostitution, sperm-donating priests, and more. Because the novel explores the gendered dimensions to family, interpersonal relations, reproductive and public health, and identity issues it can serve as a provocative supplemental text for diverse courses in sociology, psychology, gender studies, sexualities, history, public health, and related fields. The plot should resonate with young people as well as persons thinking about or trying to have children. Ultimately, The Male Clock will compel people to question how individuals and groups cope with unwanted social change that challenges our identities and social conventions. “Edgy and provocative, The Male Clock is a creative blend of sci-fi and social science that takes the reader into a dystopian future where men’s fertility is threatened and societal norms of masculinities and femininities are turned on their head. Ideal for instructors looking to integrate diverse materials into their gender, sexuality, or families courses.” – Dana Berkowitz, Associate Professor, Sociology and Women’s and Gender Studies, Louisiana State University

Written by an international team of experts, this comprehensive volume investigates modern-day family relationships, partnering, and parenting set against a backdrop of rapid social, economic, cultural, and technological change. Covers a broad range of topics, including social inequality, parenting practices, children’s work, changing patterns of citizenship, multi-cultural families, and changes in welfare state protection for families. Includes many European, North American and Asian examples written by a team of experts from across five continents. Features coverage of previously neglected groups, including immigrant and transnational families as well as families of gays and lesbians. Demonstrates how studying social change in families is fundamental for understanding the transformations in individual and social life across the globe. Extensively reworked from the original Companion published over a decade ago: three-quarters of the material is completely new, and the remainder has been comprehensively updated.

**The New Blackwell Companion to Social Theory** - Bryan S. Turner - 2016-09-26
A comprehensive new collection covering the principal traditions and critical contemporary issues of social theory. Builds on the success of The Blackwell Companion to Social Theory, second edition with substantial revisions, entirely new contributions, and a fresh editorial direction. Explores contemporary areas such as actor network theory, social constructionism, human rights and cosmopolitanism. Includes chapters on demography, science and technology studies, and genetics and social theory. Emphasizes key areas of sociology which have had an important impact in shaping the discipline as a whole.

**Family Demography in Asia** - Stuart Gietel-Basten - 2018-11-30
The demographic future of Asia is a global issue. As the biggest driver of population growth, an understanding of patterns and trends in fertility throughout Asia is critical to understand our shared demographic future. This is the first book to comprehensively and systematically analyze fertility across the continent through the perspective of individuals themselves rather than as a consequence of top-down government policies.

**A Sociology of Family Life** - Deborah Chambers - 2015-02-11
New kinds of intimate relationships such as post-divorce families, co-habiting couples, ‘friends as family’ and same-sex unions are now commonplace. This book explores the growing diversity of family life by presenting a comprehensive assessment of recent research and theory, and foregrounds new thinking about ‘family’, parenting, childhood and personal life. A Sociology of Family Life queries notions of moral decline by revealing a remarkable persistence of commitment and reciprocity across cultures in traditional and new family relations. This insightful and innovative work examines factors such as gender, race, ethnic identity and new sexual lifestyles in relation to cultural customs, government policies and social inequalities. Global dimensions of intimate life are explored, including the impact of population policies on fertility in several nations; ethical dilemmas associated with reproductive technologies among different cultures; interdependencies between rich and poor nations through the globalization of domestic care; and transnational marriage strategies. This book will be indispensable for students across the social sciences interested in change in intimate relations. Selected by Choice as a 2013 Outstanding Academic Title.

The Online World of Surrogacy - Zsuzsa Berend - 2016-09-01
Zsuzsa Berend presents a methodologically innovative ethnography of SurroMomsOnline.com, the largest surrogacy support website in the United States. Surrogates’ views emerge from the stories, debates, and discussions that unfold online. The Online World of Surrogacy documents these collective meaning-making practices and explores their practical, emotional, and moral implications. In doing so, the book works through themes of interest across the social sciences, including definitions of parenthood, the symbolic role of money, reproductive loss, altruism, and the moral valuation of relationships.

Critical Issues in Reproductive Health - Andrzej Kulczycki - 2013-08-23
In this book, leading academics and practitioners in the field of reproductive health address topics such as contraception, abortion, sexually transmitted infections, maternal and prenatal health, sexuality and reproductive rights by examining a number of critical issues in these areas. The authors describe new research, identify gaps and priorities in policy and practice, and illustrate innovative solutions. The book further addresses such current imperatives as understanding the social meanings of emergency contraception, measuring gender-based violence, improving reproductive health governance, strengthening health systems and services, and redressing institutional barriers. The book also assesses how reproductive health programs can be reconfigured to new challenges such as those posed by climate change, vulnerable youth in fragile states, and risks from new infertility treatments. Using a rich and varied set of cases, a broad public health and social science perspective, and novel methodological approaches, this book questions common assumptions, illustrates effective solutions and sets out research, policy, and programmatic agendas for the present and future. This is a comprehensive volume which provides a valuable resource to researchers, educators, practitioners, policymakers and students, as well as anyone studying or advocating for reproductive health.

Critical Issues in Reproductive Health - Andrzej Kulczycki - 2013-08-23

Diffusion Processes and Fertility Transition - National Research Council - 2001-12-15

This volume is part of an effort to review what is known about the determinants of fertility transition in developing countries and to identify lessons that might lead to policies aimed at lowering fertility. It addresses the roles of diffusion processes, ideational change, social networks, and mass communications in changing behavior and values, especially as related to childbearing. A new body of empirical research is currently emerging from studies of social networks in Asia (Thailand, Taiwan, Korea), Latin America (Costa Rica), and Sub-Saharan Africa (Kenya, Malawi, Ghana). Given the potential significance of social interactions to the design of effective family planning programs in high-fertility settings, efforts to synthesize this emerging body of literature are clearly important.

Handbook of Population - Dudley L. Poston - 2006-04-26

This comprehensive handbook provides an overview and update of the issues, theories, processes, and applications of the social science of population studies. The volume's 30 chapters cover the full range of conceptual, empirical, disciplinary, and applied approaches to the study of demographic phenomena. This book is the first effort to assess the entire field since Hauser and Duncan's 1959 classic, The Study of Population. The chapter authors are among the leading contributors to demographic scholarship over the past four decades. They represent a variety of disciplines and theoretical perspectives as well as interests in both basic and applied research.
