Writing the City - Peter Preston - 1994
The human experience, both individual and collective, contained by the city has been largely neglected by studies which have concentrated
Upon empirical models or Marxist perspectives. The city is an accumulation, not just in demographic, economic or planning terms, but also in terms of feeling and emotion. Writing the City visualizes the city through the eyes of novelists, poets and their characters. International contributors draw upon the works of writers from Europe, North America, Asia and Australia, to offer a particular witness to the challenges, opportunities, stresses and frustrations of city life. Writing the City is located at the interface of geography and literature. Cities become more than their built environment, more than a set of class or economic relationships; they are also an experience to be lived, suffered and undergone. Through the literary witness, cities are seen in terms of the innocence of an Eden now lost, a threat of sinful Babylon and the promise of a New Jerusalem. With its focus on the human experience, this book will complement the empirical perspectives of urban geographers, and appeal to students of geography, literature and sociology.

The New Jerusalem Scroll from Qumran - Michael Chyutin - 1997-11-01
This study presents the first comprehensive reconstruction of the 'New Jerusalem' Scroll from the Dead Sea, through integration of all the known fragments into a single entity. Secret ceremonies in the temple are discussed; an architectural reconstruction of the elements described in the scroll is presented, accompanied by computerized plans; a consideration of the tradition of planning the ideal city leads to an examination of the use of metrology, mathematics; and a number mysticism in the plan of the 'New Jerusalem'. A comparison is also made with the traditions of building orthogonal cities in Egypt, Greece, Rome and the Holy Land, as manifested in archaeological findings.

Shaping Jerusalem: Spatial planning, politics and
and laws, author Francesco Chiodelli Israeli-Palestinian conflict; the relentless reshaping of the Holy City by the Israeli authorities through urban policies, spatial plans, infrastructural and architectural projects, land use and building regulations. From a political point of view, the Israeli-Palestinian conflict may appear to be at an impasse; however, it is precisely by looking at the city’s physical space that one can perceive that a war of cement and stone is under way. Many books have been written on the Israeli-Palestinian conflict over Jerusalem; some of them have focused on the urban fabric; Shaping Jerusalem uniquely discusses the role of Israeli spatial actions within the conflict. It argues that Israel’s main political objective – control over the whole city – is ordinarily and silently pursued through physical devices which permanently modify the territory and the urban fabric. Relying on strong empirical evidence and data through the analysis of statistical data, official policies, urban projects, substantiates the political discussion with facts and figures about the current territorial situation of the city, and about the Israeli policies implemented in the city in the past six decades.

**The Dead Sea New Jerusalem Text** - Lorenzo DiTommaso - 2005
The Aramaic Dead Sea New Jerusalem Text (NJ) survives in seven fragmentary copies: 1Q32, 2Q24, 4Q554, 4Q554a, 4Q555, 5Q15, and 11Q18. Lorenzo DiTommaso presents an edition of the 4Q NJ fragments, including a reconstruction of the text preserved in overlapping copies. He also discusses the genre of the NJ and the order of its material, its antecedents and parallels in ancient urban design, and its place among the many ancient Jewish and Christian literary expressions of the New Jerusalem. Finally, he examines the eschatological horizon of the NJ, its possible date of composition, and its relationship with other Dead Sea texts which describe the New Jerusalem or New Temple.

Building a New Jerusalem - Francis J. Bremer - view early New England primarily from a Massachusetts viewpoint. Francis J. Bremer restores the clergyman to importance by examining Davenport’s crucial role as an advocate for religious reform in England and the Netherlands before his emigration, his engagement with an international community of scholars and clergy, and his significant contributions to colonial America. Bremer shows that he was in many ways a remarkably progressive leader for his time, with a strong commitment to education for both women and men, a vibrant interest in new science, and a dedication to upholding democratic principles in churches at a time when many other Puritan clergymen were emphasizing the power of their office above all else. Bremer’s enlightening and accessible biography of an important figure in New England history provides a unique perspective on the seventeenth-century transatlantic Puritan movement.
New England history provides a unique perspective on the seventeenth-century transatlantic Puritan movement. Images of the New Jerusalem - Craig S. Campbell - 2004

The Kansas City suburb of Independence, Missouri, is associated primarily with its most famous son, President Harry Truman. Yet Independence is also home to a unique and complex religious landscape regarded as sacred space by hundreds of thousands of people associated with the Latter Day Saint family of churches. In 1831 Joseph Smith, the founder of the Latter Day Saint (LDS) movement, declared Independence the site of the New Jerusalem, where followers would build a sacred city, the center of Zion. Smith prophesied that Jesus Christ would return in millennial and glorious advent to Independence, an act that would make the city an American counterpart to old world Jerusalem. Smith's plan would have mixed the best qualities of nineteenth-century American pastoral and urban psyche. However, the great splintering among returning Latter Day Saint groups has led to divergent beliefs and multiple interpretations of millennial place. Images of the New Jerusalem culls viewpoints from publications and interviews and contrasts them with official church doctrines and mapped land holdings. For example, with a desire to attract mainstream American, the Western LDS Church, which holds the largest amount of land in northwestern Missouri, keeps fairly silent on the New Jerusalem, while the RLDS Church (now the Community of Christ) has dropped millennial claims gradually, adopting a liberal secular style of pseudo-Protestantism. Smaller groups, independent of these two, see sacred space in more spatially and doctrinally limited ways. The religious ecology among Latter Day Saint churches allows each group its place in the public spotlight, and a number of sociopolitical mechanisms reduce conflict among them. **The New Jerusalem in the Revelation of John**
- Bruce J. Malina - 2000
There are two major entities at the close of the book of Revelation that explain the author's understanding of forthcoming life with God: the cosmic Lamb. The marriage of these two marks the concluding highpoint of John the Seer's work. What are the entities in question? How do they marry and what is the significance of that event for those who believe in Jesus as cosmic Lord? In *The New Jerusalem in the Revelation of John*, Bruce Malina offers insights into the concluding vision of the book of Revelation to assist Bible readers to understand what the visionary of Revelation said, and meant to say, to his first-century Mediterranean audience. The New Jerusalem and the Revelation of John sets out comparative models of what sorts of cities existed during the time of the New Testament and what it meant to live in an ancient Mediterranean city. It further explains the significance of the celestial marriage of the City and the Lamb. The result is a set of reading scenarios that describe and explain Revelation's closing visions, which mediate the theology of John the Seer. The definition and comparative
phenomena as signs of the time, and Revelation of John is also useful for persons interested in understanding those first "urban" members of Jesus groups addressed by other New Testament documents. Chapters are "Presuppositions about Language and Reading," "The Genre of the Book of Revelation," "The Holy City in the Sky," and "The Cosmic Lamb Marries." Includes relevant charts. Malina in these reflections has mediated a significant approach to Revelation. Irish Theological Quarterly? Against the commonplace notion that Revelation is a morbid forecast of doom, death, and destruction, Malina demonstrates the upbeat and hope-promoting force of its conclusion: a life-affirming vision of a marriage of the Cosmic Lamb (Jesus) and his bride, the Celestial City (the new and perfect Jerusalem), graphic astronomical symbols of life with God. **Reaching for the New Jerusalem** - Seong Hyun Park - 2013-08-02

The task of this book is to examine the biblical and theological meaning of the city and our mission within it. It starts with the premise that the garden is lost, and we are headed toward the New Jerusalem, the city of God. In the meanwhile, we dwell in earthly cities that need to be adjusted to God's city: "[T]he fall has conditioned us to fear the city . . . though, historically, God intended it to provide safety, even refuge. . . . We have to band together and act to take back our communities if we are to help God in the divine task of reconciling the world to Godself by assisting God in adjusting our communities to God's New Jerusalem, rebuilding our own cities of Enoch on the blueprints of Christ . . . to go into all the world and share his good news, building the Christian
act to take back our communities if we are to a city of light in which God is revealed." (from the Introduction by William David Spencer)
Toward achieving this goal, this single, accessible volume brings together the biblical, the systematic, and the practical aspects of urban ministry by various contributors who are urban practitioners and theologians themselves, and have taught at Gordon-Conwell Theological Seminary, Boston Campus.

Eve and the New Jerusalem - Barbara Taylor - 1993
When Eve and the New Jerusalem was first published over thirty years ago, it was received as a political intervention as well as a landmark historical work. Barbara Taylor became the first woman to win the Isaac Deutscher Memorial Prize, and the book went on to become a feminist classic. As women across the globe find themselves at the sharp end of neoliberal 'austerity' programmes, discriminatory social policies and fundamentalist misogyny, Eve and the New Jerusalem is as essential as it ever was.

The Struggle for Jerusalem’s Holy Places investigates the role of architecture and urban identity in relation to the political economy of the city and its wider state context seen through the lens of the holy places. Reflecting the broad disciplinary backgrounds of the authors, this book provides perspectives from architecture, urbanism, and politics, and provides in-depth investigations of historical, ethnographic and policy-related case studies. By analysing new dynamics of radicalisation through land seizure, the politicisation of parklands and tourism, the strategic manipulation of archaeological and historical narratives and material culture, and through examination of general appropriation of Jerusalem’s varied rituals, memories and symbolism for factional uses, the book reveals how possibilities of coexistence are seriously threatened in Jerusalem. Shedding new light on the key role played by everyday urban life and its spatial settings for any future political agreements about the city and its religious sites, this book is a useful reference work for students and scholars of Middle East Studies, Architecture, Religion and Urban Studies.

Christianity. One of the most significant changes these fascinating texts and their significance for the study of the history of Judaism and Christianity. One of the most significant changes that one cannot study Qumran without Jerusalem nor Jerusalem without Qumran is explored in this important volume. Although the Scrolls preserve the peculiar ideology of the Qumran sect, much of the material also represents the common beliefs and practices of the Judaism of the time. Here Lawrence Schiffman mines these incredible documents to reveal their significance for the reconstruction of the history of Judaism. His investigation brings to life a period of immense significance for the history of the Western world.

The New Jerusalem in the Book of Revelation - Pilchan Lee - 2001
There is a development between expectation for the rebuilding of the New Jerusalem/Temple in the Old Testament and the coming of the New Jerusalem/Temple in Revelation. In Revelation, there is a dynamic relation between the New Jerusalem and the Heavenly Jerusalem: the New Jerusalem is the descent of the Heavenly Jerusalem. Moreover, there is no Temple building which was expected as the eschatological promise in the Old Testament but rather God and the Lamb is the Temple. How can this shift be explained? Shaping Jerusalem - Francesco Chiodelli - 2016-10-14
Shaping Jerusalem: Spatial planning, politics and the conflict focuses on a hidden facet of the Israeli-Palestinian conflict; the relentless reshaping of the Holy City by the Israeli authorities through urban policies, spatial plans, infrastructural and architectural projects, land use and building regulations. From a political point of view, the Israeli-Palestinian conflict may appear to be at an impasse; however, it is

that one can perceive that a war of cement and stone is under way. Many books have been written on the Israeli-Palestinian conflict over Jerusalem; some of them have focused on the urban fabric; Shaping Jerusalem uniquely discusses the role of Israeli spatial actions within the conflict. It argues that Israel’s main political objective – control over the whole city – is ordinarily and silently pursued through physical devices which permanently modify the territory and the urban fabric. Relying on strong empirical evidence and data through the analysis of statistical data, official policies, urban projects, and laws, author Francesco Chiodelli substantiates the political discussion with facts and figures about the current territorial situation of the city, and about the Israeli policies implemented in the city in the past six decades.

From a political point of view, the Israeli-Palestinian conflict may appear to be at an impasse; however, it is precisely by looking at the city’s physical space that one can perceive that a war of cement and stone is under way. The Temple Scroll and Related Texts, one of the series Companion to the Qumran Scrolls, is a comprehensive roadmap to the Temple Scroll, the longest and one of the most complex of the manuscripts from Qumran. The central chapter contains a discussion of the contents of the Temple Scroll, including sections on the Temple and its courts, purity regulation, the festival calendar, and the Deuteronomic Paraphrase with the Law of the King. The Companion also includes a chapter on the Description of the New Jerusalem, as well as one on the relationship of the Temple Scroll to the Book of Jubilees, 4QMiqsat Ma'aseh ha-Torah, and the Damascus Document. Written in accessible language and featuring extensive bibliographies, this Companion is ideal for undergraduate and graduate classes.
Utopian thinking as to how people might live together more harmoniously—the dream of the perfect city, the New Jerusalem—has been revived in different forms and at different times, from early medieval monasteries to contemporary alternative communities. In 1902, Ebenezer Howard, renowned social reformer and founder of the garden movement, published Garden Cities of To-Morrow, a book originally to be called New Jerusalem and a work that became one of the most influential town planning documents of the twentieth century. In New Jerusalem: The Good City and the Good Society, Ken Worpole reveals that utopian and visionary thinking, especially in relation to new forms of settlement and livelihood, has not gone away, even if it has gone underground. With an unprecedented growth in the population of older people, along with increasing cultural and demographic change elsewhere in society, there is renewed interest in more convivial forms of urban design, as well as shared living. This interest draws on a long history of elective communities, including those influenced by the thought and works of Emanuel Swedenborg—a fascinating history with much to offer the architects and policymakers of today.

**What on Earth Is Heaven Like?** - Janet Willis - 2015-10-07
This book examines what the Bible says about Jerusalem's future. Someday it will literally be heaven on earth. "Janet has brought together the heart of one passionate for truth, the skill of an able student of the Word, and the keen eye and hand of an artist. Janet has collated the Scriptures into a systematic theology about the future City of God: the New Jerusalem. Janet's work is thorough without being overly technical, making it accessible to anyone who wants to be a better student or teacher of the Bible. She has done the church a wonderful service." Dr. David L. Burggraff, Ph.D. Professor of Theology Shepherds Theological Seminary Cary, NC

The articles collected here present the fruits of 25 years of scholarship on Qumran and the New Testament. The author situates the New Testament within the pluralistic context of Second Temple Judaism, presents detailed overviews on the discoveries from Qumran, the source value of the ancient texts on the Essenes, the interpretation of the archaeological site, the various forms of dualism within the texts, the meals, and scriptural authority in the Scrolls. He evaluates the various patterns of relating Jesus and the apostles to the Scrolls or the Qumran community, presents methodological reflections on comparisons and detailed surveys of the most important insights from the Qumran discoveries for the understanding of Jesus, Paul, and the Fourth Gospel. This volume demonstrates how the discovery of the Scrolls has influenced and changed New Testament scholarship.

**Getting from Babylon to New Jerusalem** - Joseph Adamson - 2003-10-01
This is perhaps the strongest volume so far in the Real Prophecy Unveiled series. It answers and refutes the criticism and accusations that have been leveled at the author by the Religious Right. This book proves the critics wrong. This book discusses the role and function of the Christ and his messenger; the virgin birth myth; the Prophet Daniel's vision; the "Fall of Babylon;" the keys to Ageless Wisdom; the basics of most spiritual humanity; "original sin" and salvation; the real meaning of religious freedom; the meaning and purpose of prophecy; the new "kingdom" to come; and how we get from this "Babylon" to the "New Jerusalem" of prophecy. It provides even more reasons why the American New Right will fall, discussing the big picture of corporate power; economic and corporate reform; political reality; grossly under-reported or ignored news; the Bush Administration's folly, lies and falsehoods that have misled many people; similar errors of some local politicians; and the unity platform that can help resolve many of our economic problems.

Godless - Paul Ham - 2019-08
IN FEBRUARY 1534 a radical religious sect whose disciples were being persecuted throughout Europe seized the city of Münster, in the German-speaking land of Westphalia. They were convinced that they were God's Elect, specially chosen by the Almighty to be the first to ascend to Paradise on Judgement Day, as told in the Book of Revelation. And it would all happen here, in 'New Jerusalem' (as they renamed the city), during Easter 1535, when God and Christ would descend and usher in the End Times. But the 'Melchiorites', as they were called after their founding prophet, would be well-prepared for Apocalypse, swiftly turning the city into a Christian theocracy- They threw out the Catholics and Lutherans, 'rebaptised' their followers, destroyed all old religious icons, adopted a communist system of shared property, and imposed a new law of polygamy that compelled all women and girls who'd reached puberty to marry. Because women outnumbered men about three times, many men had 3-5 wives. John of Leiden, who proclaimed himself 'king' of New Jerusalem, had 16 wives - all according to

Living Together Separately - Michael Romann - 2014-07-14
Much has been written about the religious and political conflicts of contemporary Jerusalem—and about the harsh realities of the intifada. But while analysts probe the violence in the "reunited city," its residents must go about their daily affairs. Focusing on the conduct of everyday life, rather than on ideology, Living Together Separately provides a rare look at the complex networks of practical relations developed by Jews and Arabs in over two decades of Israeli control of the city. The work begins with a brief
demand technology to again make available city. Then, combining the perspectives of urban geography and social anthropology, it addresses a wide range of questions. How does the use of urban space and urban systems reflect both segregation and integration? How do ethnic identities influence interactions in adjoining neighborhoods, in workplaces, and in a hospital? What rules govern Arab-Jewish contacts in business, consumer, and political settings? In the final chapter the authors evaluate the Jerusalem situation in comparison with conditions in other deeply divided cities and in light of the intifada. Long-time residents of Jerusalem, Romann and Weingrod seek to grasp the variety of day-to-day exchanges without preconceptions and from the viewpoints of all participants. "Michael Romann and Alex Weingrod are my pick to serve on a jury trying a very tangled case."--Fouad Ajami, School of International Studies, The Johns Hopkins University Originally published in 1991. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**City of Collision** - Philipp Misselwitz - 2006-06-02

War has entered the cities. Since September 11, 2001 at the latest, it has become apparent that this is the case not only in Jerusalem and the Middle East, but also in Western metropolises. This book presents a thorough investigation of the current situation in Jerusalem from a trilateral perspective: Israeli, Palestinian, and
discussion centers on the production and use of urban space under the conditions created by the conflict, including, for example, the so-called security fence, urban enclaves, exclaves, the approach to monuments and no-man’s-land, and the instrumentalization of infrastructures, which leads to the crass juxtaposition of highly developed and impoverished urban spaces. The conflict, however, does not bring with it destruction and violence alone, but also exhibits ambivalent effects and, along with them, new cultural and urban realities. September 2001 ist deutlich geworden, dass nicht mehr nur Jerusalem und der Nahen Osten betroffen sind, sondern auch westliche Metropolen. Das Buch stellt eine umfassende urbanistische Untersuchung der aktuellen Situation in Jerusalem aus trilateraler Perspektive vor: israelische, palästinensische und internationale Fachleute kommen zu Wort. Diskutiert werden Produktion und Nutzung von städtischem Raum unter den Bedingungen des Konflikts, wie z.B. der sog. Sicherheitszaun, urbane Enklaven, Exklaven, der Umgang mit Monumenten und Niemandsland oder die Instrumentalisierung von Infrastrukturen, die zu einem krassen Nebeneinander von hoch entwickelten oder verarmten städtischen Räumen führen. Der Konflikt bringt jedoch nicht nur Destruktion und Gewalt mit sich, sondern zeigt vielmehr auch ambivalente Wirkungen und mit ihnen neue kulturelle und urbane Realitäten. Jerusalem ist zu einem Prototyp im Zeitalter neuer städtischer Gewalt geworden.

Wresting this revered metropolis from these misleading, tired clichés, The City-State of Boston highlights Boston’s overlooked past as an autonomous city-state, and in doing so, offers a pathbreaking and brilliant new history of early America. Following Boston’s development over three centuries, Mark Peterson discusses how this self-governing Atlantic trading center began as a refuge from Britain’s Stuart monarchs and how—through its bargain with the slave trade and ratification of the Constitution—it would tragically lose integrity and autonomy as it became incorporated into the greater United States. The City-State of Boston peels away layers of myth to offer a startlingly fresh understanding of this iconic urban center.

Building the Cold War - Annabel Jane Wharton
In postwar Europe and the Middle East, Hilton hotels were quite literally "little Americas." For American businessmen and tourists, a Hilton Hotel—with the comfortable familiarity of an English-speaking staff, a restaurant that served cheeseburgers and milkshakes, trans-Atlantic telephone lines, and, most important, air-conditioned modernity—offered a respite from the disturbingly alien. For impoverished local populations, these same features lent the Hilton a utopian aura. The Hilton was a space of luxury and desire, a space that realized, permanently and prominently, the new and powerful presence of the United States. Building the Cold War examines the architectural means by which the Hilton was written into the urban topographies of the major cities of Europe and the Middle East as an effective representation of the United States. Between 1953 and 1966, Hilton International built sixteen luxury hotels abroad. Often the Hilton was the first significant modern structure in the host city, as well as its finest hotel. Hiltons introduced a striking visual contrast to the traditional architectural forms of such cities as Istanbul, Cairo, Athens, and Jerusalem, where the impact of its new architecture was amplified by the hotel's unprecedented siting and scale. Even in cities familiar with the Modern, the new Hilton often dominated the urban landscape with its height, changing the look of the city. The London Hilton on Park Lane, for example, was the first structure in London that was higher than St. Paul's cathedral. In his autobiography, Conrad N. Hilton claimed that these hotels were constructed for profit and for political impact: "an integral part of my dream was to show the countries most exposed to Communism the other side of the coin—the fruits of the free world." Exploring everything the carefully drafted contracts for the buildings to the remarkable visual and social impact on their host cities, Wharton offers a theoretically sophisticated critique of one of the Cold War's first

Exploring everything the carefully drafted contracts for the buildings to the remarkable visual and social impact on their host cities, Wharton offers a theoretically sophisticated critique of one of the Cold War's first international businesses and demonstrates that the Hilton's role in the struggle against Communism was, as Conrad Hilton declared, significant, though in ways that he could not have imagined. Many of these postwar Hiltons still flourish. Those who stay in them will learn a great deal about their experience from this new assessment of hotel space.

**The Urban University and its Identity** - Herman van der Wusten - 2012-12-06
The chapters in this book are revised versions of papers initially presented at a conference on Universities and their cities held in Amsterdam on March 27-29 1996. There were about one hundred participants and 45 written contributions from Europe, the US, Canada and Australia. People with different disciplinary backgrounds, geographers, historians, sociologists, economists and planners among them, attended, as did a few university administrators and local government officials. The intricate relationships between universities and their cities were intensively debated from the perspective of possible contributions by the university to city life as well as from the angle of the city as a milieu that affects the university's functioning. There were theoretical and historical papers, and a series of case studies, some of them comparative, as well as proposals and descriptions of efforts to improve city-university

People with different disciplinary backgrounds, geographers, historians, sociologists, economists and planners among them, attended, as did a few university administrators and local government officials. The intricate relationships between universities and their cities were intensively debated from account of the diversity of experience brought together for the purpose of a debate on a matter of common interest. The various university settings within Amsterdam were visited during a guided tour that provided food for thought on the matters under discussion by means of a living example.

The Planning and Building of the Hebrew University, 1919-1948 - Diana Dolev - 2016-03-08

Since the construction of the first Holy Temple on Mount Moriah in Jerusalem in 957 BCE, the site became one of the holiest places for Jews,
though none of them were fully implemented. The Dome of the Rock was built during early Islam, the edifice replaced the temple and for centuries pilgrims, travelers, and locals would climb up to the Mount Scopus summit for the magnificent view it afforded. Hence, planning and building an institute of national importance on Mount Scopus could not disregard the implications of that view of the Temple Mount—in terms of beauty, religious sentiments, and the link to a historic golden age. The Planning and Building of the Hebrew University, 1919–1948: Facing the Temple Mount traces, for the first time, the history of the construction of this highly significant Zionist enterprise. It follows the years of the British Mandate rule over Palestine, bookended between the Ottoman Empire government and Israel's independence—an era of great changes in the area, Jerusalem in particular. In the three decades between 1919 and 1948, five different master plans were drawn up for the university, and seven buildings were designed and fully completed. Each plan and building presented an interpretation of a university conception that also related to prevailing styles and ideological trends. Underlying each one were intricate power struggles, donors' wishes, and architectural concerns. Internationally famous town-planners and architects such as Patrick Geddes and Erich Mendelsohn took part in designing the campus. The book also reveals comparatively unknown architects and their contribution to the campus.

Kahn at Penn - James Williamson - 2015-03-24
Louis I. Kahn is widely known as an architect of powerful buildings. But although much has been said about his buildings, almost nothing has been written about Kahn as an unconventional teacher and philosopher whose influence on his students was far-reaching. Teaching was vitally important for Kahn, and through his Master’s Class at the University of Pennsylvania, he exerted a significant effect on the future course of architectural practice and education. This book is a critical, in-depth study of Kahn’s philosophy of

Teaching was vitally important for Kahn, and through his Master's Class at the University of Pennsylvania, he exerted a significant effect on the future course of architectural practice and education. This book is a critical, in-depth study of Kahn's philosophy of education and his unique pedagogy. It is the first extensive and comprehensive investigation of the Kahn Master's Class as seen through the eyes of his graduate students at Penn.

**Dictionary of New Testament Background** -

The 'Dictionary of New Testament Background' joins the 'Dictionary of Jesus and the Gospels', the 'Dictionary of Paul and his Letters' and the 'Dictionary of the Later New Testament and its Developments' as the fourth in a landmark series of reference works on the Bible. In a time when our knowledge of the ancient Mediterranean world has grown, this volume sets out for readers the wealth of Jewish and Greco-Roman background that should inform our reading and understanding of the New Testament and early Christianity. 'The Dictionary of New Testament Background', takes full advantage of the flourishing study of the Dead Sea Scrolls and offers individual articles focused on the most important scrolls. In addition, the Dictionary encompasses the fullness of second-temple Jewish writings, whether pseudepigraphic, rabbinic, parables, proverbs, histories or inscriptions. Articles abound on aspects of Jewish life and thought, including family, purity, liturgy
The 'Dictionary of New Testament Background' culture is displayed in articles ranging across language and rhetoric, literacy and book benefactors, travel and trade, intellectual movements and ideas, and ancient geographical perspectives. No other reference work presents so much in one place for students of the New Testament. Here an entire library of scholarship is made available in summary form. The Dictionary of New Testament Background can stand alone, or work in concert with one or more of its companion volumes in the series. Written by acknowledged experts in their fields, this wealth of knowledge of the New Testament era is carefully aimed at the needs of contemporary students of the New Testament. In addition, its full bibliographies and cross-references to other volumes in the series will make it the first book to reach for in any investigation of the New Testament in its ancient setting.
