**100 Ways in 100 Days to Teach Your Baby Maths** - Emma Smith - 2021-09-21
Maths ability on entry to school is the strongest predictor of later academic achievement, double that of literacy skills, and simply saying more number words to babies increases their maths ability. What else have scientists, psychologists and professors learned about maths for babies? Babies seem to be born with an amazing number sense: understanding shapes in the womb, being aware of quantities at seven hours old, calculating probability at six months old, and doing addition and subtraction at nine months old. The best time to introduce maths is infancy. By the time children enter school there is already a significant gap in maths skills, this gap
Increasing over time. A parent’s attitude shapes a child’s attitude. Parents have the power to teach their babies that learning maths can be either something to feel anxious about or something to enjoy. Babies can learn maths while boosting all other areas of development. For example, movement is boosted while teaching geometry positional language, literacy is boosted while reading a “number” book, and bonding is boosted by giving a baby undivided attention while teaching maths to him or her. Maths is important. Babies will use maths every day for the rest of their lives. What about the impact of gender, culture, videos, sleep, diet—even the type of pushchair you buy? 100 Ways in 100 Days to Teach Your Baby Maths holds the answers.

Your Baby's Mind - S. H. Jacob - 2009-03-01
Once I had a dream. In my dream I saw a large screen. On half the screen pieces of wood floated across and formed part of a cross in which was written, "All have sinned and come short of the glory of God." In my dream I thought, "Something is missing!" Then pieces of wood floated across the screen forming the other half of the cross. On that half these words formed, "God so loved the world that he gave his only begotten Son that whosoever believes in him
Once I had a dream. In my dream I saw a large screen. On half the screen pieces of wood floated across and formed part of a cross in which was written, "All have sinned and come short of the glory of God." In my dream I thought, "Something is missing!" Then pieces of wood floated across the screen forming the other half of the cross. On that half these words formed, "God so loved the world that he gave his only begotten Son that whosoever believes in him should not perish but have everlasting life." The cross before me was empty except for the words written on it. The one who had died on the cross was risen. He had triumphed through the cross and over came sin, death and hell. That is the balance and beauty of the greatest story ever told and the true story that gave me beauty for my ashes. Once I lived. I grew. I laughed. I failed. I hurt. I was ashes. Then I searched. I hoped. I found. I repented. I believed. I endured. I cried. I succeeded. I loved. I rejoiced. I died. Now I'm glorified! Dean L. Gossett

Baby Hearts - Susan Goodwyn, Ph.D. -
Who says your baby can’t “talk” about his or her feelings? In fact, babies’ actions often speak louder than words! Understanding those actions—and responding appropriately to them—is the key to giving your child a head start to a healthy and happy future. Now the authors of the bestselling Baby Minds and Baby Signs translate the latest research on the rich inner life of babies into practical, fun activities that will foster your child’s emotional skills during the most critical period—between birth and age three. This comprehensive guide will help you help your child express emotions effectively, develop empathy, form healthy friendships, and cope with specific challenges. Learn how to: •Talk with your child about emotions in order to help him recognize and control his own •Use face-to-face interaction, tone of voice, song, and touch to make your infant feel safe and secure •Start a gratitude journal to help your child appreciate the good things in life •Nurture self-esteem with “try, try again” activities and simple chores •Create a “What are they feeling” deck of cards to help your child understand and practice emotions •Use games and songs to help your child practice self-control •Overcome temper tantrums, aggression, shyness, separation anxiety, and other challenges. Whether your child is as easy to raise as a sunflower, as difficult as the prickly holly bush, requires the patience of the delicate orchid, or is as active as the exuberant dandelion, Baby Hearts helps you provide the emotional support that may be the most important gift a parent can give.

My First 100 Words - High Contrast Baby Book for Newborns - SkyRocket Publishing - 2021-04-13
This book is designed to provide early visual stimulation for babies. A High-Contrast Book not only contains pictures related to First 100 Words to provide early visual stimulation for babies, but it also helps to stimulate the creative side of your child. Psychologists and educators agree that High-Contrast Pictures has a positive impact on many areas of our children's lives. What Are The Benefits Of High Contrast Books For Babies? Because high contrast images are easier for babies to interpret, they are the best way for your tot to lengthen their attention span, improve their memory and develop their nervous system. It is also beneficial in terms of social development. Concentration and creativity - high contrast images requires concentration on one activity for a long time, the child develops the ability to focus attention and creativity by black & white colors. Memory development - the child learns about colors, shapes, and pictures, and characters by presenting them in different situations. These activities deepen knowledge, develop imagination, and memory. What does a newborn baby see immediately after birth? Already in the womb newborns can distinguish light from darkness. Just after birth we can notice that they react with squinting to every contact with stronger light. From that moment their eyesight develops intensively and with every month they start to see more and more new images and colors. The eyes of a newborn baby are also learning to work together and need a long training to see like their parents. Simply registering an image is not enough - the brain still has to interpret it, and it can learn this only in a few months. At first, the image is quite blurry, but it gradually improves. When does a newborn baby see colors? What colors does a newborn baby see? Immediately after birth a newborn baby can distinguish light from darkness and reacts to a stream of light by closing its eyes. Research shows that the first colors a newborn baby sees are white, black and shades of gray. The contrast between black and white allows the newborns to better recognize the contours and facial features of their parents. The next color that newborns see is red. How long do babies need high contrast? Until about the fifth month, babies use their eyes as the primary source for information about the world and how it works. Once your baby’s pupils are working and his two eyes start to coordinate, he’ll be compelled to look at high contrast images, especially from birth to 14 weeks old. Are high contrast videos good for babies? In a nutshell, black and white contrast or visually stimulating toys and gear DO NOT promote learning in babies under 6 months of age. On the contrary, these products can cause over-stimulation in early infancy, which in turn causes fussiness and poor sleep habits. Why are there black and white baby books? As young eyes are developing and learning to focus on the world around them, black and white books with simple lines and bold patterns are easier for babies to see. The bold images stand out against a typically blurry world. This will help your baby learn to focus. Take the time to tell babies about the pictures. If you want your child to spend time in a funny and enjoyable way and at the same time develop their skills, choose our book. Greetings!!!
