Nationalism and National Integration - Anthony H. Birch - 2012-11-12
Nationalist theories are still controversial, while the process and frequent failures of national integration are issues of central importance in the contemporary world. Birch's argument is illustrated by detailed and topical case studies of national integration in the United Kingdom, Canada and Australia: the United Kingdom, with the Welsh, the Scots, the Irish and the coloured minorities; Canada, with its Anglo-French tensions, its cultural pluralism and its indigenous peoples claiming the right of self-government; Australia, with its increasing ethnic diversity and its failure to integrate the Aborigines.

The Muslim Reality in India - Ishtiyaque Danish - 2016-06-08
The Muslim Reality in India is a collection of articles dealing with several aspects of Muslim presence in post-independence India. This edited volume highlights not only the problems the Muslim community is confronted with, but also shows the way ahead. The most obvious and visible reality in India is its pluralistic and composite culture. Every multicultural society is a unique experience; it creates and solves problems. The book in your hand has discussed it very well. Indian Muslims feel marginalized politically, economically and socially. Their educational status is pathetic, to say the least. The most obvious and visible reality in India is its pluralistic and composite culture. Every multicultural society is a unique experience; it creates and solves problems. The book in your hand has discussed it very well. Indian Muslims feel marginalized politically, economically and socially. Their educational status is pathetic, to say the least. But what has been frightening the Muslims the most is the frequent outbreak of communal violence. There is also the lurking danger of uniform civil code which has the potential to violently polarize the country along communal lines. Similarly widespread discrimination, and in some cases social exclusion are also important problems. There are internal as well as external reasons behind the problems mentioned above. The Muslim Reality in India is an attempt to analyse the problems objectively and find out viable solutions to them. Like the causes of the problems, the solutions, too, are both internal and external. The Muslim Reality in India is thus an objective analysis as well as approach to solve the problems of the largest minority in the country.

Plural societies all over the world are facing the challenge of integrating the minorities into mainstream polity and society. India is a land of many languages, cultures and religions. It is an ideal place where one can see the minorities in their different dimensions. It is the home to the second largest Muslim population in the world, and their integration into mainstream politics has remained a challenge to the secular polity of India. The present work ‘Muslim Minorities and the National Commission for Minorities in India’, deals with the Muslim situation in India and the institutional response of the state towards them. It locates the problem of Muslim minorities in the larger context of minority rights and discusses the efficacy of the redress mechanisms, like National Commission for Minorities, in forging the community within larger society. The study highlights that the institutionalization of minority rights and the safeguards, like the monitoring mechanisms, are not just enough, and should also be supported by strong appreciation for the principle of pluralism for the integration of minority communities in the plural societies. The book will be useful to academicians, researchers, students and general public interested in the study of political science, public policy, sociology, plural societies, and minority rights.

### Promoting and Protecting Minority Rights

Minorities make significant contributions to the richness and diversity of society, and States that recognise and promote minority rights are more likely to remain tolerant and stable. The United Nations and other intergovernmental organisations recognise that minority rights are essential to protect those who wish to preserve and develop values and practices which they share with other members of their community. This Guide offers information related to norms and mechanisms developed to protect the rights of persons belonging to national, ethnic, religious or linguistic minorities. It provides detailed information about procedures and forums in which minority issues may be raised within the United Nations system and in regional systems. It is hoped that this Guide will be useful in assisting minority advocates to make full and effective use of existing international mechanisms and, ultimately, to promote and protect the rights guaranteed under international instruments.

### Routledge Handbook of South Asian Politics

- Paul R. Brass - 2010-04-30

The Routledge Handbook of South Asian Politics examines key issues in politics of the five independent states of the South Asian region: India, Pakistan, Bangladesh, Sri Lanka, and Nepal. Written by experts in their respective areas, this Handbook introduces the reader to the politics of South Asia by presenting the prevailing agreements and disagreements in the literature. In the first two sections, the Handbook provides a comprehensive introduction to the modern political history of the states of the region and an overview of the independence movements in the former colonial states. The other sections focus on the political changes that have occurred in the postcolonial states since independence, as well as the successive political changes in Nepal during the same period, and the structure and functioning of the main governmental and non-governmental institutions, including the structure of the state itself (unitary or federal), political parties, the judiciary, and the military. Further, the contributors explore several aspects of the political process and political and economic change, especially issues of pluralism and national integration, political economy, corruption and criminalization of politics, radical and violent political movements, and the international politics of the region as a whole. This unique reference work provides a comprehensive survey of the state of the field and is an invaluable resource for students and academics interested in South Asian Studies, South Asian Politics, Comparative Politics and International Relations.

Citizenship, Diversity and Pluralism - Alan C. Cairns - 2000-04-04
Citizenship has both a vertical and a horizontal dimension. The vertical links individuals to the state by reinforcing the idea that it is "their" state – that they are full members of an ongoing association that is expected to survive the passing generations. Accordingly their relation to the state is not narrowly instrumental but is supported by a reservoir of loyalty and patriotism that gives legitimacy to the state. The horizontal relationship is the positive identification with fellow citizens as valued members of the same civic community. Here citizenship reinforces empathy and sustains solidarity through its official endorsement of who counts as "one of us." Citizenship, therefore, is a linking mechanism that in its most perfect expression binds the citizenry to the state and to each other. In Citizenship, Diversity, and Pluralism leading scholars assess the transformation of these two dimensions of citizenship in increasingly diverse and plural modern societies, both in Canada and internationally. Subjects addressed include the changing ethnic demography of states, social citizenship, multiculturalism, feminist perspectives on citizenship, aboriginal nationalism, identity politics, and the internationalisation of human rights.
