...is a small book, filled with stunning images, to enjoy and be inspired. —New York Times
Kathleen O'Neal Gear and Bruce Chatwin, authors of The Way of All Flesh and The Map of Time, introduce us to a mysterious and enigmatic figure who lived more than 200 years before: the great French mathematician and philosopher, René Descartes.

The little book also includes a selection of Cartes’s reflections on philosophy and science, as well as an introduction by the O’Neals that contextualizes his ideas within the larger context of 17th-century intellectual history.

The Descartes Book is available at most major bookstores or online retailers. It makes an ideal gift for anyone interested in the history of philosophy or the life and work of René Descartes.
