Challenging conventional wisdom about German dominance in the new Europe, this study presents a new approach to the question of power and influence after the Cold War. Ann L. Phillips's analysis of German relations with East-Central Europe convincingly demonstrates how the interplay of domestic and international politics has resulted in the forma and influence in the region. This radical departure has won many critics of German unification and the activities of German policy-affiliated foundations— to explore the international-dominant democracies and consider new empirical evidence to the debate over German hegemony.
